EXPERIENCE

Kasimu

JUNIOR DEVELOPER | 01/21 - 03/22 | MADRID - SPAIN

Kasimu background music for business, hilo musical y videos musicales para supermercados, tiendas, restaurantes, hoteles y locales.

- I developed the new web design with responsive design of 3 websites which were web player, control panel and song manager using React and Bulma for the UI, MobX to manage the global state and Storybook to develop and document the components.
- I developed a mobile app with React Native to play the songs and ads of businesses.
- Productive collaboration with my team to make decisions in the developmente and implementation of the product.
- Implementation of dockerization of the web sites to solve the versioning problem and to be able to deploy it in containers.
- New deployment of the websites through AWS since the versions were deprecated and I was able to upgrade to Amazon Linux 2.
- Integration and configuration of CI/CD with Gitlab to automate the development and production process since it was done manually.

PROFILE

I'm a full stack developer who has always been interested in solving problems and since I discovered programming, I have all the tools to achieve my goals. After the high school I met Plataforma 5 a Coding Bootcamp. Today I continue in the tech industry to learn and perfect my hard and soft skills.
